

# AISA Whole-School Sustainability Plan 2026–2027

## Theme

Small Actions, Lasting Impact

---

## Vision

To cultivate environmentally responsible global citizens by embedding sustainability into learning, leadership, and daily school practices. Through curriculum integration, student-led action, and community partnerships, AISA will empower students to become agents of positive environmental change.

---

## Strategic Goals

### Goal 1: Sustainability Education

Embed sustainability concepts across all grade levels and curricula.

### Goal 2: Student Leadership

Provide meaningful opportunities for students to lead sustainability initiatives.

### Goal 3: Sustainable Campus

Reduce waste, conserve resources, and improve environmental practices across the school.

### Goal 4: Community Engagement

Strengthen partnerships with families, local organizations, and the Jane Goodall Roots & Shoots network.

### Goal 5: Environmental Stewardship

Develop a culture where sustainable practices become part of everyday life.

---

# Curriculum Integration

## Elementary School (PYP)

### PYP Connections

Sustainability naturally aligns with:

- Sharing the Planet
- How the World Works
- Where We Are in Place and Time

### Student Learning Experiences

Students will:

- Investigate ecosystems and biodiversity
- Explore waste reduction and recycling
- Examine human impact on the environment
- Participate in gardening and conservation projects
- Take action through service learning

### Possible PYP Projects

- Pollinator Garden
  - School Waste Audit
  - Earth Day Exhibition
  - Recycling Campaigns
  - Water Conservation Awareness
- 

## Middle School (OpenSciEd / NGSS)

### NGSS Connections

#### *Grade 6*

- Ecosystems and Interactions
- Human Impacts on Earth Systems
- Resource Management

#### *Grade 7*

- Matter Cycling
- Engineering Design Solutions
- Energy and Resource Use

### Grade 8

- Natural Selection and Biodiversity
- Climate Change
- Human Sustainability Challenges

## Student Learning Experiences

Students will:

- Conduct environmental investigations
- Design sustainability solutions
- Analyze environmental data
- Participate in citizen science projects
- Develop advocacy campaigns

## Possible OpenSciEd Connections

- Sustainability Shark Tank
- Water Conservation Campaigns
- School Energy Audits
- Biodiversity Surveys
- Climate Action Projects

---

## High School (American Curriculum / NGSS)

### Biology

Students will investigate:

- Biodiversity
- Ecosystem Stability
- Conservation Biology
- Human Impacts on Ecosystems

### Chemistry

Students will investigate:

- Green Chemistry
- Pollution
- Water Quality
- Sustainable Materials

## Physics

Students will investigate:

- Renewable Energy
- Energy Efficiency
- Solar Power
- Sustainable Technologies

## Environmental Science

Students will:

- Conduct environmental audits
  - Analyze sustainability policies
  - Evaluate environmental data
  - Develop community action plans
- 

## IB Diploma Programme

### ESS (Environmental Systems & Societies)

Students will:

- Examine sustainability challenges
- Conduct environmental research
- Analyze local and global environmental issues
- Develop solutions for environmental management

### CAS Connections

Students may:

- Lead sustainability initiatives
  - Participate in Eco Committee projects
  - Organize awareness campaigns
  - Support community environmental action
- 

## Year-Long Sustainability Initiatives

### Eco Committee

Student representatives from Elementary, Middle, and High School.

## Responsibilities

- Lead sustainability campaigns
  - Organize environmental events
  - Conduct environmental audits
  - Promote Roots & Shoots projects
  - Mentor younger students
- 

## Green Classroom Challenge

Monthly competition focused on:

- Recycling
  - Energy conservation
  - Water conservation
  - Classroom cleanliness
  - Participation in sustainability activities
- 

## Badge of Green Programme

Recognition system for:

- Individual students
  - Classrooms
  - Teachers
  - Sustainability Champions
- 

## Term 1

### Reduce, Reuse, Reimagine

#### Focus

Waste Reduction and Circular Economy

#### Whole-School Initiatives

#### Uniform & Clothing Collection Drive

Collection of:

- Uniforms
- Sports clothing
- Lost and found items

## Clothing Swap Day

Promoting:

- Reuse
- Responsible consumption
- Circular economy practices

## Junk Kouture Project

Students design fashion pieces using recycled materials.

## International Day Showcase

Junk Kouture designs featured during International Day celebrations.

## Plastic-Free Challenge Month

School-wide reduction of single-use plastics.

## Success Criteria

- 25% reduction in single-use plastics
  - Clothing swap programme established
  - Minimum 10 Junk Kouture entries
- 

# Term 2

## Growing for the Future

### Focus

Biodiversity, Conservation, and Food Systems

## Whole-School Initiatives

### Vegetable Garden

Students participate in:

- Planting
- Maintaining

- Harvesting
- Composting

## Native UAE Pollinator Garden

Supporting:

- Biodiversity
- Pollinators
- Native species conservation

## World Wildlife Day

(March 3)

School-wide awareness campaign.

## Earth Day Festival

(April 22)

Student-led exhibitions and sustainability showcases.

## Success Criteria

- Vegetable garden established
  - Pollinator garden established
  - Every grade level participates in Earth Day activities
- 

# Term 3

## Climate Action Starts Here

### Focus

Energy, Water, and Climate Solutions

### Whole-School Initiatives

### Water Conservation Campaign

Students conduct:

- Water audits
- Awareness campaigns
- Conservation recommendations

## Energy Saving Challenge

Classroom energy reduction competition.

## Sustainability Innovation Challenge

Students develop solutions related to:

- Waste
- Energy
- Water
- Biodiversity

## World Environment Day

(June 5)

Celebration of student leadership and environmental action.

## Success Criteria

- Water-saving initiatives implemented
  - Energy-saving initiative adopted
  - Student sustainability solutions showcased
- 

# Jane Goodall Roots & Shoots Programme

Throughout the year students will complete projects focusing on:

## People

- Clothing donations
- Community support initiatives
- Awareness campaigns

## Animals

- Pollinator projects
- Wildlife conservation
- Biodiversity monitoring

## Environment

- Waste reduction
- Tree planting
- Campus greening projects

---

## Key Sustainability Dates

### September

World Cleanup Day

### October

World Energy Day

### February

UAE National Environment Day

### March

World Wildlife Day International Day of Forests World Water Day

### April

Earth Day

### May

World Bee Day International Day for Biological Diversity

### June

World Environment Day World Oceans Day

---

## End-of-Year Sustainability Expo

Students showcase:

- Garden projects
  - Junk Kouture creations
  - Sustainability investigations
  - Eco Committee projects
  - Roots & Shoots initiatives
-

## Whole-School Success Indicators

- Establish a permanent uniform and clothing swap programme.
- Launch and maintain a vegetable garden.
- Create a native pollinator garden.
- Reduce single-use plastics by 30%.
- Achieve 80% student participation in sustainability initiatives.
- Complete at least three Roots & Shoots action projects.
- Increase student leadership opportunities through Eco Committee and Green Ambassadors.
- Showcase sustainability learning across PYP, OpenSciEd, NGSS, American Curriculum, and IB Diploma pathways.
