In this document

Overview & key dates · Phase 1 — Get ready · Phase 2 — Before the test · Phase 3 — Test day · Handling incidents · Finalising · Troubleshooting · Quick checklists · Getting help

1 Overview & key dates

Three phases, three audiences. Phase 1 is the AI Lead setting the school up. Phase 2 and 3 belong to the Proctor in the room. Students only ever see Phase 3.

PHASE 1 · AI LEAD

Get ready

Log in, assign proctors per grade, set roster permissions and the timetable, confirm devices.

PHASE 2 · PROCTOR

Before the test

Open your grade's roster, confirm every student is on it, add anyone missing.

PHASE 3 · PROCTOR + STUDENT

Test day

Generate the access code, get students signed in, brief them, watch the room.

Who does what

AI Lead

- Signs in with Training platform credentials (the Trainee account)
- Assigns Proctor accounts, per grade
- Sets the assessment window per grade & section
- Owns smooth, end-to-end execution
- Marks each session complete when it is done

Proctor

- Verifies students, adds any who are missing
- Generates the access code per session
- Briefs students and monitors the room
- Reports any incident on the platform

Student

- Uses a laptop or desktop, per school device policy
- Signs in with their Student ID
- Enters the Proctor's session code
- Completes the assessment in one sitting

WHO THIS DOES NOT APPLY TO

Charter schools, schools following the MoE curriculum, and schools whose academic year does not begin in August or September.

2 Phase 1 — Get ready AI LEAD

Access and proctor setup. Do all of this before the first session is due to run — a Proctor cannot see a roster or generate a code until their account is assigned to a grade.

2.1 Log in AI LEAD

- 1 Go to instructwin.com/aigt (<https://instructwin.com/aigt>).
- 2 Select **Assessments**.
- 3 Choose your role: **AI Lead & Proctor**.
- 4 Enter your email and password, then sign in.

CREDENTIALS

The same email and password as your **Trainee account** on the Training platform. There is no separate AIGT password.

Figure 1 Signing in

[Click to enlarge](#)

2.2 Switch between your two roles — optional AI LEAD

Every AI Lead is **also a Proctor for every grade** by default. If you don't want that, remove yourself from a grade — or add other staff and stay on as a primary or secondary Proctor yourself (see 2.3).

Profile > Change Role > pick a role

Figure 2 Switching profile

[Click to enlarge](#)

2.3 Assign Proctor accounts, per grade

AI LEAD

Class Management > your grade > Add a proctor

- 1 Click **Class Management** in the left menu.
- 2 Select the grade or year you want to add a Proctor to.
- 3 Pick an existing Proctor from the list on the right — or create a new one with their first name, last name, username and email.
- 4 Click **Save changes**.

NEW PROCTOR PASSWORDS

Creating a Proctor generates a default password, shown to you on creation — or you can set the password yourself for that Proctor. Note it down: you are the one who passes it on.

ROSTERS ARE PER GRADE, NOT PER SECTION

Several Proctors can be assigned to the same grade, and they all see the same student list.

Figure 3 Class Management

Figure 4 Choosing an existing Proctor

Enlarge

Figure 5 Adding a new Proctor

Enlarge

2.4 Let Proctors manage the roster

AI LEAD

Proctors can add missing students by default. This is the permission that controls it — a Proctor without it cannot add or remove anyone.

Proctors > : next to their name > Manage Roster Access

BEFORE YOU REMOVE A STUDENT

Students are **not** split across sections. Check they are not enrolled in another Proctor's section for the same grade — removing them affects **every section that shares that grade**.

Figure 6 Granting roster access

Click to enlarge

2.5 Set the assessment timetable

AI LEAD

AI GT Timetable > Add

- 1 Click **AI GT Timetable** in the left menu.
- 2 Click **Add** to create a new schedule record.
- 3 Choose the grade, section and assigned Proctor(s), then set the date and time.
- 4 Repeat for **every grade and every section** in the school.

THESE RECORDS GO TO ADEK

The timetable is shared with ADEK, and the assessment only becomes available to a grade's students once its window is set here.

Figure 7 Adding a timetable record

[Click to enlarge](#)

2.6 Device, internet & power readiness

AI LEAD

Confirm this setup is the same for every student sitting the test:

- A **laptop, desktop or tablet** — school-provided or personal, per school policy — running an up-to-date **Chrome or Safari**.
- Reliable internet **at the student's seat**, not just in the building.
- Reliable power — a charged laptop, or an outlet within reach.
- School IT has confirmed the network allows `instructwin.com`.
- Other tabs and applications **closed before starting**, so nobody minimises the assessment window by accident.

WHY THE CLOSED TABS MATTER

Minimising or switching away from the assessment window **auto-flags the session and notifies ADEK**. An accidental Alt-Tab counts.

3 Phase 2 — Before the test

PROCTOR

Roster checks, done ahead of the day — not on it. A student who isn't on the roster cannot sit the test, and sorting that out with five minutes to go is the single most common way a session runs late.

3.1 Verify the student roster

PROCTOR

- 1 Log in with the credentials your AI Lead gave you.
- 2 Open the **Roster** tab to see your grade's students.
- 3 Check every student in your assigned grade appears — then **confirm it with your AI Lead**. That confirmation is your responsibility, not theirs.

Figure 8 Checking the student list

[Click to enlarge](#)

3.2 Add or remove a student

PROCTOR

TO ADD SOMEONE

Click **Enroll Student**, then enter their first name, last name and Student ID.

TO REMOVE SOMEONE

Click the **delete** icon next to their enrolment — after checking they are not in another section of the same grade.

IF THE BUTTONS AREN'T THERE

You need **Manage Roster Access**, which only the AI Lead can grant (see 2.4).

Figure 9 Adding a student to the roster

[Click to enlarge](#)

4 Phase 3 — Test day

PROCTOR

STUDENT

Codes, logins, briefing, monitoring. Read section 4.3 aloud before anyone clicks Start.

4.1 Generate the access code

PROCTOR

Just before the session starts, click **Regenerate Code**. That creates a new **4-digit code** every student in the room uses to sign in.

COPY IT IMMEDIATELY

Navigate away without copying the code and you cannot see it again — you have to generate a new one, which **replaces the old code for every student**. Write it on the board first.

THE CODE LASTS ONE HOUR

Once it expires students can no longer sign in, and you must generate a new one to restore access.

Figure 10 Finding the assessment

Enlarge

Figure 11 The access code

Enlarge

4.2 Student login

STUDENT · PROCTOR-ASSISTED

- 1 Go to instructwin.com/aigt (<https://instructwin.com/aigt>), click **Assessment**, then select **Student**.
- 2 Enter the **Username (Student ID)** and the **access code** from the Proctor.
- 3 Click **Sign In**.
- 4 Click **Start** to begin.

THE CODE IS SHARED, THE USERNAME IS NOT

Every student in the room types the same access code, but signs in under their own Student ID. Check the name on screen belongs to the student sitting there.

Figure 12 Signing in

Enlarge

Figure 13 Clicking Start

Enlarge

Figure 14 Answering and submitting

Enlarge

4.3 Brief students before they start

PROCTOR

Read this aloud

- " The assessment lasts **45 minutes**, plus a **5-minute grace period**.
- " Do **not** close or minimise the browser until you have clicked **Submit** — doing so automatically flags your session.
- " Report any technical issue to me **immediately**.

4.4 Monitor the room

PROCTOR

- Observe students' screens **continuously** throughout the session.
- Check the **name on screen** matches the student actually sitting there.
- Do **not** leave the room unattended while the assessment is running.
- Report any suspected violation **on the platform, immediately** — see section 5.

4.5 Timing rules

PROCTOR

45_{min}
ASSESSMENT

5_{min}
GRACE PERIOD

50_{min}
HARD LIMIT

- Time taken on the assessment is **tracked**.
- Minimising the browser before submitting **auto-flags the session and notifies ADEK**.
- The assessment is completed in **one sitting**.

5 Handling incidents

PROCTOR

Anything that happens during a session is logged **on the platform** — not by email, not verbally. That includes technical problems, not just integrity concerns.

5.1 What counts as a violation

PROCTOR

- Any form of **cheating** during the assessment.
- **Minimising or switching away** from the assessment window.
- Any other integrity concern you observe.

5.2 Report an incident

PROCTOR

Incidents > New Incident > Log Incident

- 1 Click **Incidents** in the left menu.
- 2 Click **New Incident**.
- 3 Select the class, and whether it concerns the **whole class** or **a specific student**.
- 4 Choose a category, set the severity, and add a title and description.
- 5 Click **Log Incident**.

CATEGORIES ON THE FORM

Technical issue · Accidental submission · Timing issue · Content issue · Absence / late start · Behavioural disruption · Suspected cheating · Other. Severity runs Low · Medium · High · Critical.

LOG IT WHILE YOU REMEMBER IT

Say what happened, when, and any steps already taken. A thin description written a day later is worth much less than two sentences written in the room.

Figure 15 Logging an incident

[Click to enlarge](#)

6 Finalising AI LEAD

The last step, and the one most easily forgotten — a session nobody marks complete stays open in ADEK's view of the school.

6.1 Mark the assessment complete

AI LEAD

AI GT Timetable > the session's row > Mark complete

- 1 Open **AI GT Timetable**.
- 2 Find the schedule record for the session that has finished.
- 3 Click **Mark complete**.

THIS NOTIFIES ADEK AUTOMATICALLY

Nothing else needs sending. A row marked complete can be reopened if you close it by mistake.

Figure 16 Marking a session complete

[Click to enlarge](#)

7 Troubleshooting

The six things that actually go wrong, and who fixes each one.

PROBLEM	WHAT TO CHECK	WHO FIXES IT
Student cannot log in	Is the username (Student ID) right, is the access code right, and has the code expired?	Proctor
Session code expired	Generate a new one with Regenerate Code — it replaces the old code for everyone.	Proctor
Student missing from the roster	Add them with Enroll Student (see 3.2).	Proctor
Assessment auto-submitted early	Check whether the 50-minute limit was reached.	Proctor
Cannot reach the platform at all	Confirm the school network allows <code>instructwin.com</code> .	School IT InstrucTwin
Proctor cannot add or remove students	Confirm Manage Roster Access has been granted (see 2.4).	AI Lead

8 Quick checklists

Tick as you go — this page remembers your progress on this device. Nothing is sent anywhere.

AI Lead

0 of 8 done

- ☐ Logged in at instructwin.com/aigt with Training platform credentials
- ☐ Reviewed and adjusted the default Proctor assignments per grade
- ☐ Added any additional Proctor accounts needed
- ☐ Granted Manage Roster Access to the Proctors who need it
- ☐ Set the timetable for every grade and section
- ☐ Confirmed device, internet and power readiness across the school
- ☐ Had every Proctor confirm their grade's roster is up to date
- ☐ Marked each completed session as complete in AIGT Timetable

Proctor

0 of 7 done

- ☐ Logged in with the credentials from the AI Lead
- ☐ Verified the roster for my grade and told the AI Lead
- ☐ Added any missing students before the session
- ☐ Briefed students on the rules and timing before starting
- ☐ Generated the access code and shared it with students
- ☐ Monitored the room for the full session
- ☐ Reported any incidents directly on the platform

9 Getting help

Anything on the platform

Technical, scheduling or just unclear — InstructTwin Support is reachable through your platform account, or at support@instructwin.com.

Rosters, proctors, timetable

Your school's **AI Lead** owns all three. Go to them before you go to the platform.

Network access

If instructwin.com is blocked or slow on the school network, that is one for **School IT**.

The curriculum behind the test

See the [AI Literacy teacher readiness module](https://aisa-ai-web.github.io/The-Learning-Hub/PD%20Modules/ai-curriculum-readiness-module.html) (<https://aisa-ai-web.github.io/The-Learning-Hub/PD%20Modules/ai-curriculum-readiness-module.html>) and the [KG–12 Scope & Sequence](https://aisa-ai-web.github.io/The-Learning-Hub/PD%20Modules/ai-literacy-scope-and-sequence.html) (<https://aisa-ai-web.github.io/The-Learning-Hub/PD%20Modules/ai-literacy-scope-and-sequence.html>).

Source: *AI Growth Test — AI Lead & Proctor User Guide*, version 1.0, last updated 12 September 2026. Republished here for AISA staff; the wording has been reorganised for the screen but the procedures, timings and rules are unchanged. Screenshots are the guide's own, and show demonstration data only.

If the platform changes and a step here no longer matches what you see, the platform is right — tell the AI Lead so this page can be corrected.
