

AI Literacy

Everything in one place: the training, the curriculum map, the platform, the assessment, and what is due when. If you are teaching the AI Literacy curriculum this term, start at the top and work down.

AISA Teaching & Learning · printed from the Learning Hub. The Hub is the live version — check it before relying on a date in this file.

Monday 21 September, 3:10–4:25 pm — Secondary Gym

One session, in the room, building on the readiness module you completed. The questions you wrote in the module are what set the agenda.

When

3:10 – 4:25 pm, Monday 21 September

Where

Secondary Gym

aka the Big Gym

Bring

Your device, charged

Who has to attend

- **All secondary teaching staff** — required, whether or not you are delivering AI Literacy lessons yourself.
- **KG and Elementary — homeroom teachers only.** If you are not a homeroom teacher in KG or Elementary, this session is not for you.

This has changed. Attendance is no longer limited to the people who received the original email. Widening it to every secondary teacher means the whole division can pick the curriculum up if timetabling or staffing shifts later in the year — you are not being added to the teaching roster by turning up.

Before you come

1. **If you are teaching AI Literacy this term, finish the readiness module** — about 60 minutes, and it saves as you type, so a part-finished one picks up where you left off. **If you are not, it is not required of you**, but the session builds on it, so skimming it is worth the time.
2. **Bring the plan you wrote in the module.** We use it for about two minutes at the start — you will not be writing it again. On paper or on screen, either is fine, and it prints from the end of the module.
3. **Bring your device, charged** — and its charger if it does not hold a full afternoon. You will be working on it in the room.

Teaching starts this week — your first lesson falls somewhere in the week of 21 September, not necessarily on the Monday.

Open the readiness module

Start here

The three things every teacher delivering this curriculum needs. The training first, the curriculum map when you plan, the tracker when you assess.

Required

Revisit the training

The self-paced readiness module — around 60 minutes end to end. It saves as you type, so reopening it brings back your own answers and the six-line plan you wrote for your first lesson.

≈ 60 minutes

Reference

Scope & Sequence, KG–Grade 12

The full curriculum map: the progression grade by grade, what students are expected to reach by the end of each phase, and how each of the four strands builds year on year.

It is a reference, not a module — there is nothing to complete. Dip into your grade when you plan beyond your first lesson.

Open Scope & Sequence

InstrucTwin — lesson plans and student materials

ADEK publishes the full AI Literacy lesson plans, teacher toolkits and student materials on InstrucTwin. The AI Growth Test runs there too, on a separate portal.

Known issue: the lessons are still uploading

The address is settled — ADEK confirmed it on 21 September. The lessons themselves are still arriving: InstructTwin has confirmed a **bulk upload in progress**, so your grade may not be there yet, and staff accounts are separately not reliably showing assigned grades. Both are the AI Lead's to chase, not yours, and both are being chased. **Your first lesson does not wait on either.** The curriculum focus for your grade is held inside the training module, and the plan you wrote there is complete on its own — it is what you teach from this week. When the ADEK lesson lands you read it against your plan, which takes five minutes instead of an hour.

Curriculum & lesson plans

Sign in with your school username and password, find your grade, then your unit, then your lesson for the week.

Open adek.instructwin.com

www.adek.instructwin.com/

Confirmed by ADEK on 21 September. Earlier versions of the training module pointed at schools.instructwin.com — if you bookmarked that one, replace it.

AI Growth Test portal

A separate sign-in, using your Training platform credentials. This is where AI Leads and proctors manage rosters, access codes and test sessions.

Open instructwin.com/aigt

instructwin.com/aigt

Step-by-step instructions for this portal are in the AI Lead & Proctor guide, linked under Assessment below.

If you cannot get in

- 1. Tick the "I could not get into InstructTwin" box in the training module. That is the only signal of who tried, and it reaches the AI Lead.
- 2. Carry on teaching from the plan you wrote in the module. You have not lost anything.
- 3. For a platform fault rather than an access problem, InstructTwin support is at support@instructwin.com. If the site is blocked or slow on the school network, that one is for AISA IT.

How often you teach it

Teaching started the week of 21 September 2026 — your lesson falls somewhere in the week, not necessarily on the Monday. Two numbers matter here: ADEK's entitlement, which is what ADEK audits against, and how AISA delivers it, which is what you plan around.

KG – Grade 5

One period a week

ADEK's entitlement is one period a week, and nothing changes at AISA: homeroom teachers deliver one timetabled, standalone AI lesson each week.

Grades 6 – 12

One timetabled period, the rest asynchronous

ADEK's entitlement is two periods a week. AISA timetables one of them; the remainder of the entitlement is completed asynchronously.

Assessment — the AI Growth Test

ADEK's AI Growth Test is a baseline measure of where students are starting from. Every student in Grades 4–12 sits it; K–3 do not. ADEK's testing window closes on Sunday 4 October 2026, and AISA's dates for each grade are announced separately by the AI Lead.

Who runs the test

- **Grades 4 and 5** — proctored by the class's own homeroom teacher. Settled.
- **Grades 6–12** — arrangements are still open. You will hear before anything is asked of you.
- **KG–Grade 3** — do not sit this test at all.

Guide

AI Lead & Proctor guide

ADEK's operational runbook, rebuilt for the screen: set-up, access codes, roster checks, what to say to students, test-day monitoring and incident reporting. Filter it to your role so you only read the steps that are yours.

English only.

Open the guide

The AI Literacy assessment tracker — where ongoing assessment is recorded — is the third card under [Start here](#).

Level 1 AI Foundations (ADEK)

Separate from the AISA readiness training above, and mandatory for every teacher — not only those delivering the AI curriculum. Seven self-paced modules, around 17 hours on average.

New to AISA this year?

ADEK's deadline for completing Level 1 is **Wednesday 30 September 2026**. Seventeen hours is not an evening's work, so start now if you have not.

Not enrolled yet? Email the AI Lead with your full name *exactly* as it appears in PASS, plus your PASS number — ADEK needs both to enrol you.

Already finished it?

ADEK is checking completion records before it issues certificates. The platform records time spent on each section, and sections clicked through quickly will be reset and have to be redone.

ADEK will tell the AI Lead who is affected, and those teachers will be contacted directly. Otherwise there is nothing you need to do.

Responsible use, and who to tell

Keep student details out of AI tools

No names, photographs, assessment data or anything else that identifies a student goes into a general-purpose AI tool. This follows ADEK's School Digital Policy and UAE data protection law, and it applies to the tools you use to prepare a lesson as much as to the ones students use in it.

AI Vision & Ethical Framework module

aisa-ai-web.github.io/The-Learning-Hub/PD%20Modules/ai-ethics-module.html

An AI concern is a safeguarding concern

If a student discloses something through an AI task, or a tool returns something that worries you, it goes to your Safeguarding Lead — not to IT and not to the tool's support desk. Report it **within 24 hours**; if a child may be at immediate risk, contact them straight away.

Elementary

Alia Nejdawi

anejdawi@aisa.sch.ae

Secondary

Savvas Largatzis

slargatzis@aisa.sch.ae

Segment 6 of the training module works through the first ten minutes of a disclosure, if you want the detail.

Questions

“Do I actually have to do the training?”

The readiness module is required for the teachers named on AISA's ADEK Implementation Form — the staff delivering AI Literacy lessons this term. It is not required for everyone else, and it does not count against anyone else's training record.

Issue No. 5 of the Digital Lion checks your own address against that list and tells you which side of it you are on.

Check whether it applies to you

aisa-ai-web.github.io/The-Learning-Hub/Media%20Hub/sep18.html#status-card

Ask the AI Lead

Access, enrolment, planning, a lesson that did not go the way you expected — all of it goes to the AI Lead.
